

Motion design showreel

The following video (also found here <https://youtu.be/PfXhZi3PrNo>) presents a compilation of previous motion design work I have done, ranging from university projects to freelance motion graphic work, the work with timestamps can be found below.

Content

0:02	Yellow building appears and rotated in ‘fake’ 3D: inspired by architecture in Norrköping, the city I lived in for 4 months as part of an Erasmus exchange programme during my bachelor
0:08	Talking planet: explainer video for an animation and storytelling course
0:10	Space bottle with growing plant inside: personal skill development project
0:14	Glass filling with water: personal skill development project
0:16	Bald guy coming to life: personal skill development project
0:19	Freelance animation project for Webappdesigners
0:23	Suitcase filling with toys: explainer video for a university project start-up idea for glow in the dark badminton rackets.
0:34	Freelance animation project for Webappdesigners
0:42	Black Lives Matter: animation and storytelling course
0:59	Rocket: explainer video for a data physicalisation course project
1:02	Exploded view of a panel: explainer video for a human centred design course
1:07	Identifying a meteorite: explainer video for an animation and storytelling course
