Brainstorming

Brainstorming

Wing complexity

Feather pattern: 'cap' and 'beard'

Balance simplicity and details ensuring recognisability even with only the face

Outline breaks brand style, too fine details as they won't be visible from a distance

Too high contrast

Not versatile, won't work on all backgrounds

Beak colour and design

Inspired by Dora beak, Beak stands out, which makes sense if it is the key to deciphering messages

Powerup

Gradient can animate and be customized based on the background
