

## Interaction Lab Identity Design

The Interaction Lab at the University of Twente provides a space for students and researchers to share knowledge across interactive technology fields. It is based on three pillars; technology, togetherness and research.

### Problem

The Interaction Lab at the University of Twente, established in 2022, needed to build recognition and stand out within the university. I contributed by implementing a unique brand identity across Instagram, flyers, business cards, and other materials to boost awareness and solidify its position on campus.

### Audience

Students, professors and researchers interested in interactive technologies.

### My contribution

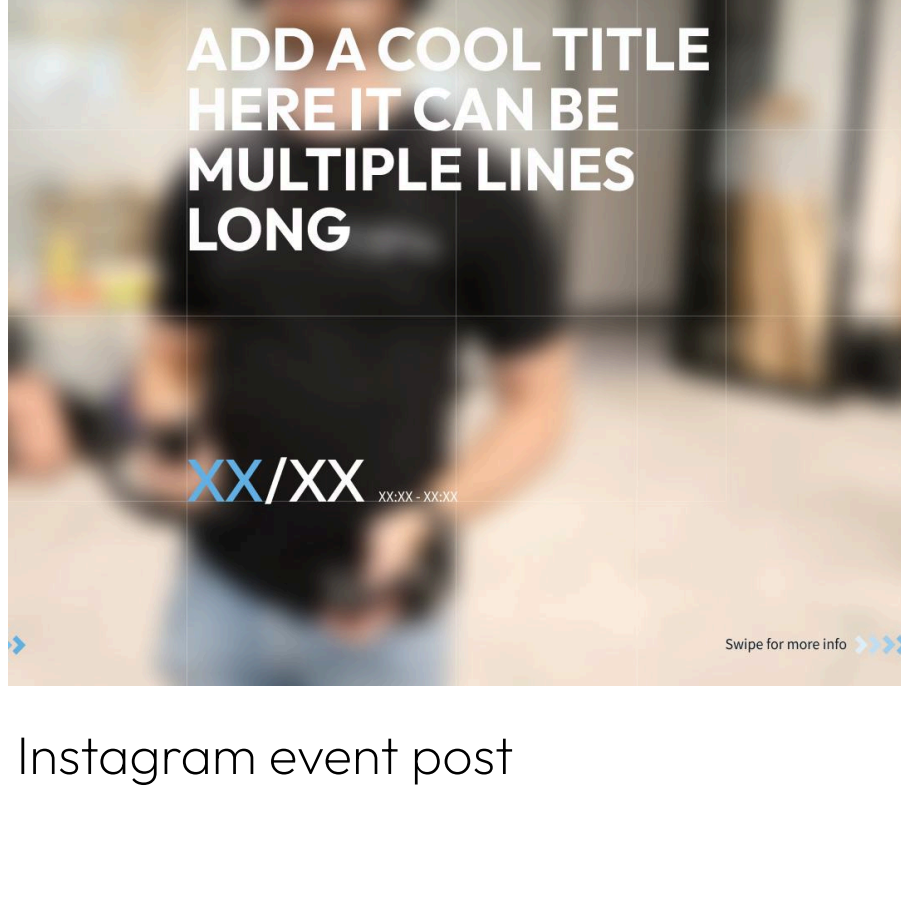

I was the primary designer of the Interaction Lab, however, I regularly met with the previous designer to brainstorm ideas and share feedback.

Business card

Flyer

Instagram event post

## Flyers

### Purpose

Communicate what the Interaction Lab is and what facilities it offers.

### Audience

Students, professors and researchers present at conferences or visiting the Interaction Lab.

### Medium

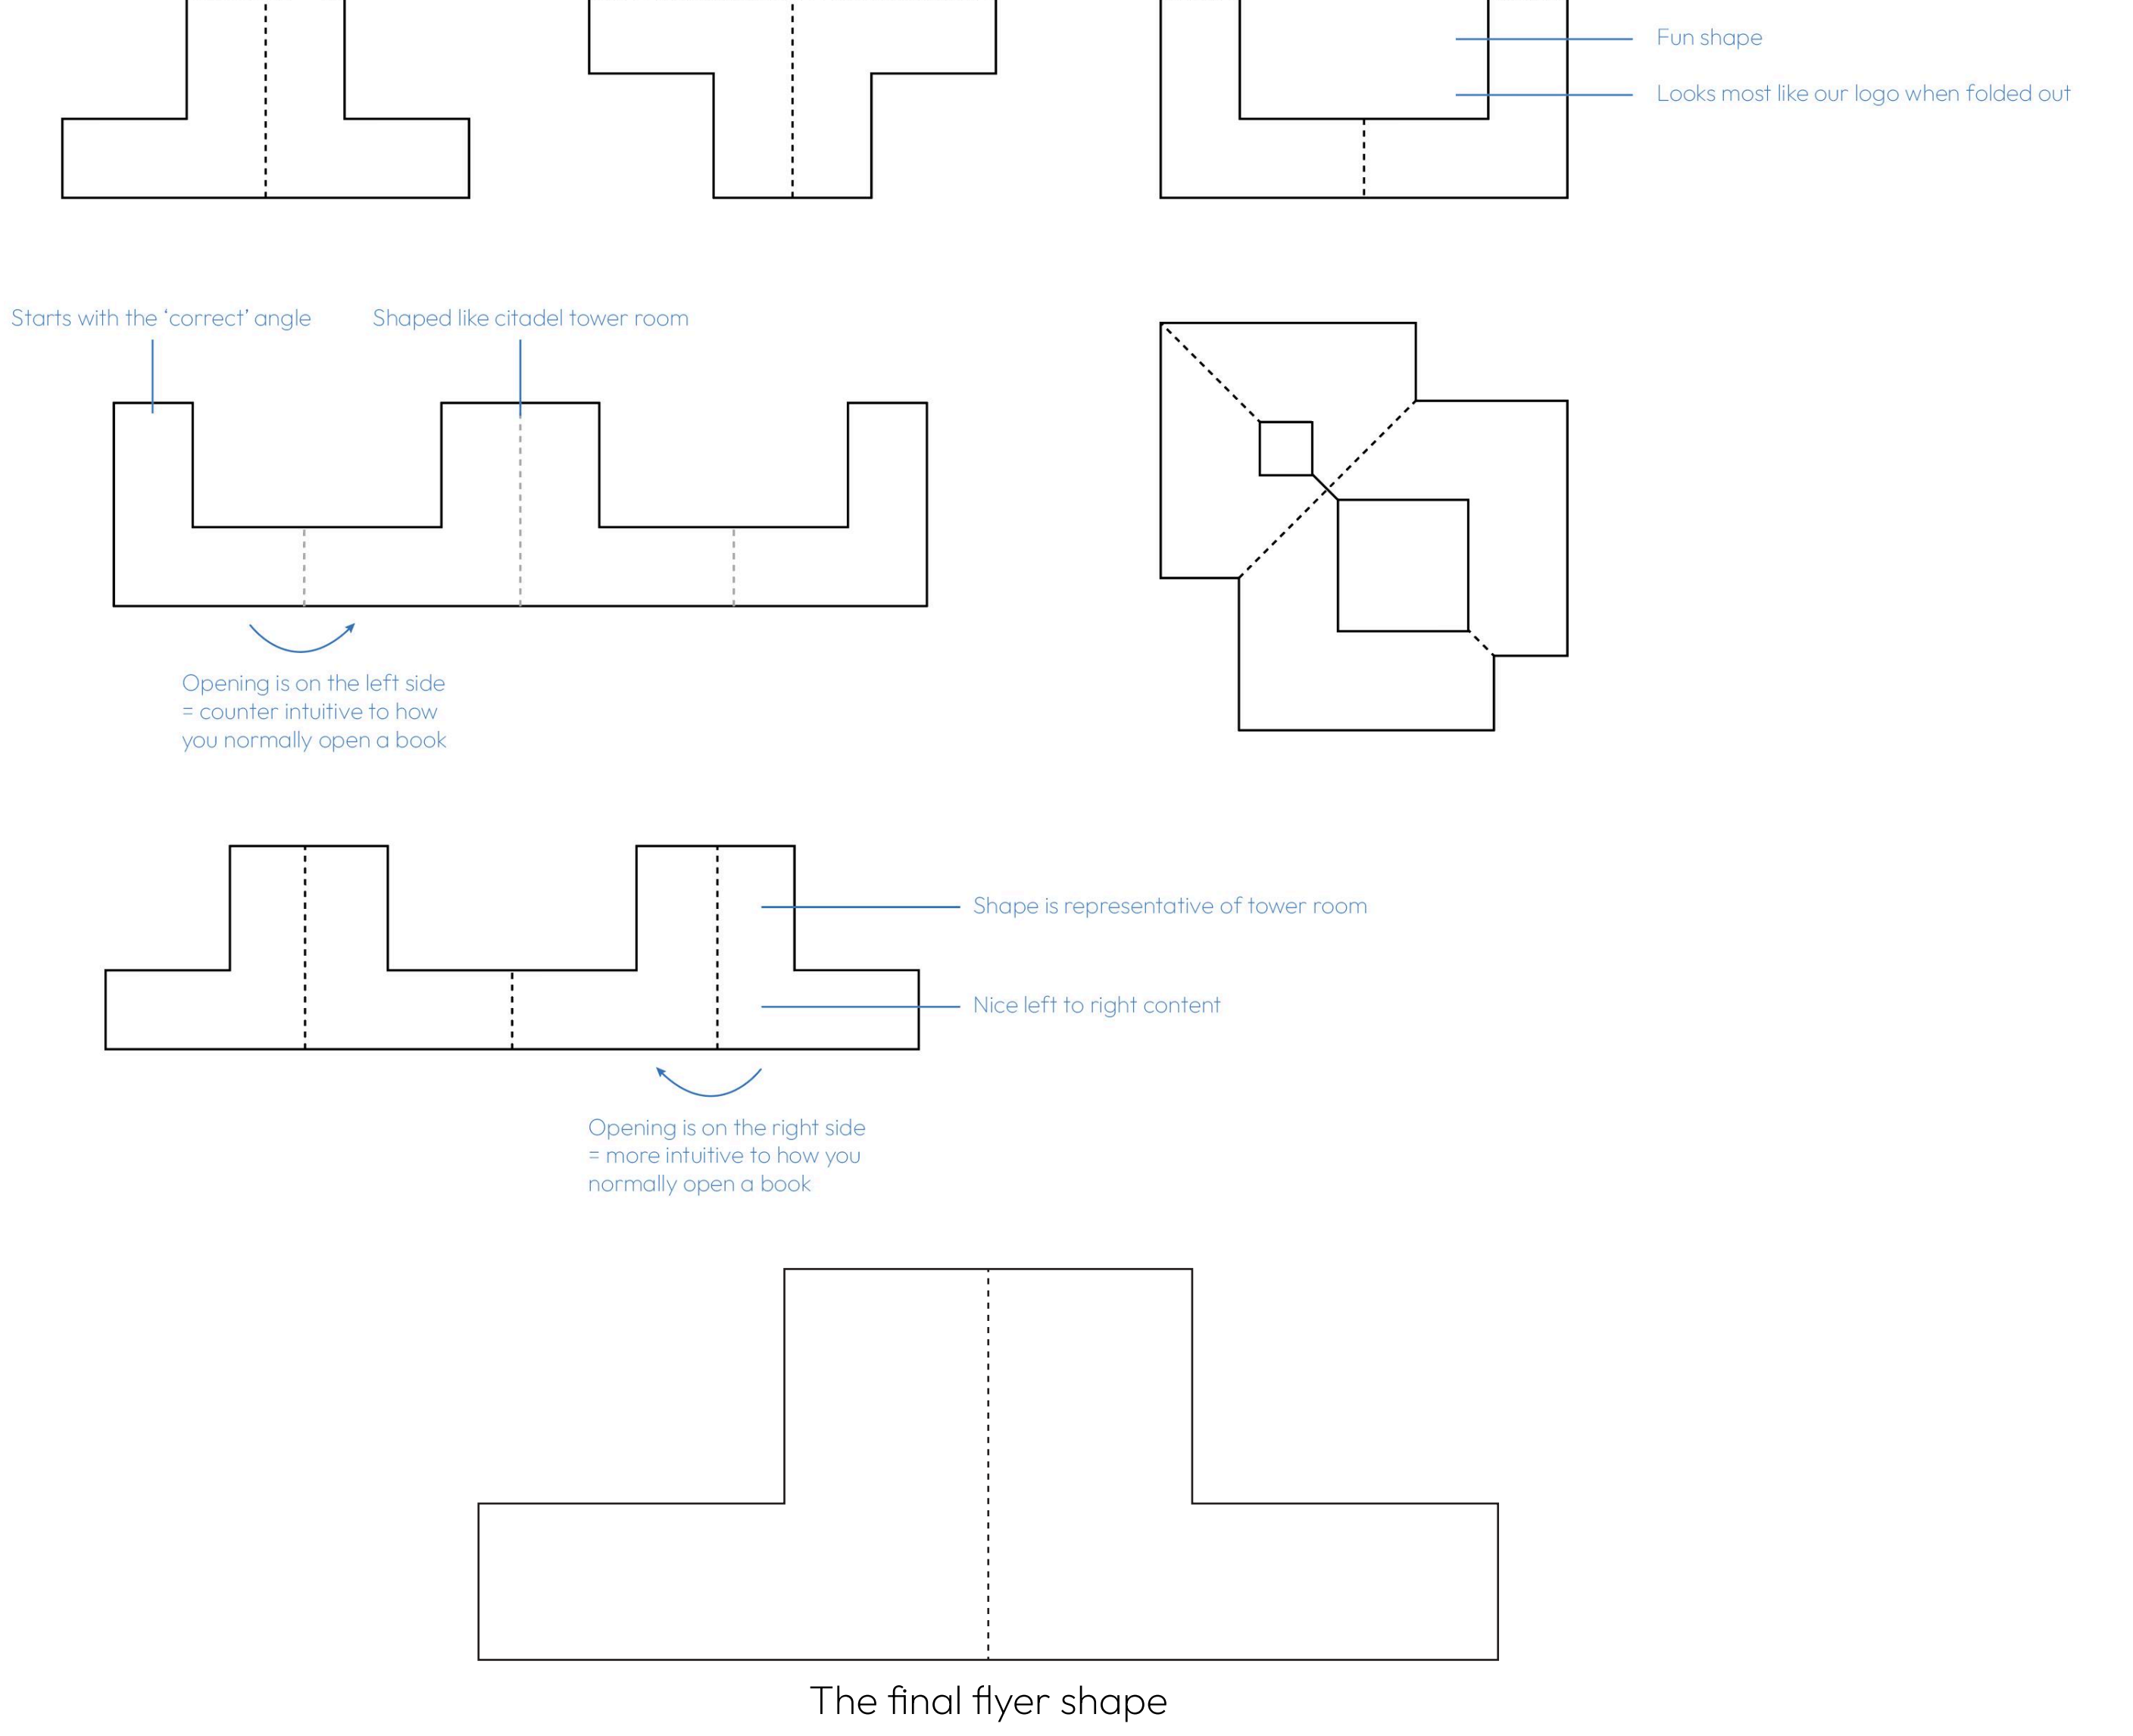

Printed.

### My contribution

Designing the flyers and incorporating feedback.

## Concept exploration

I wanted to experiment with a unique flyer shape to help it stand out compared to rectangular ones and represent the Interaction Lab identity. This was done by using one of the logo corner elements as a starting point.

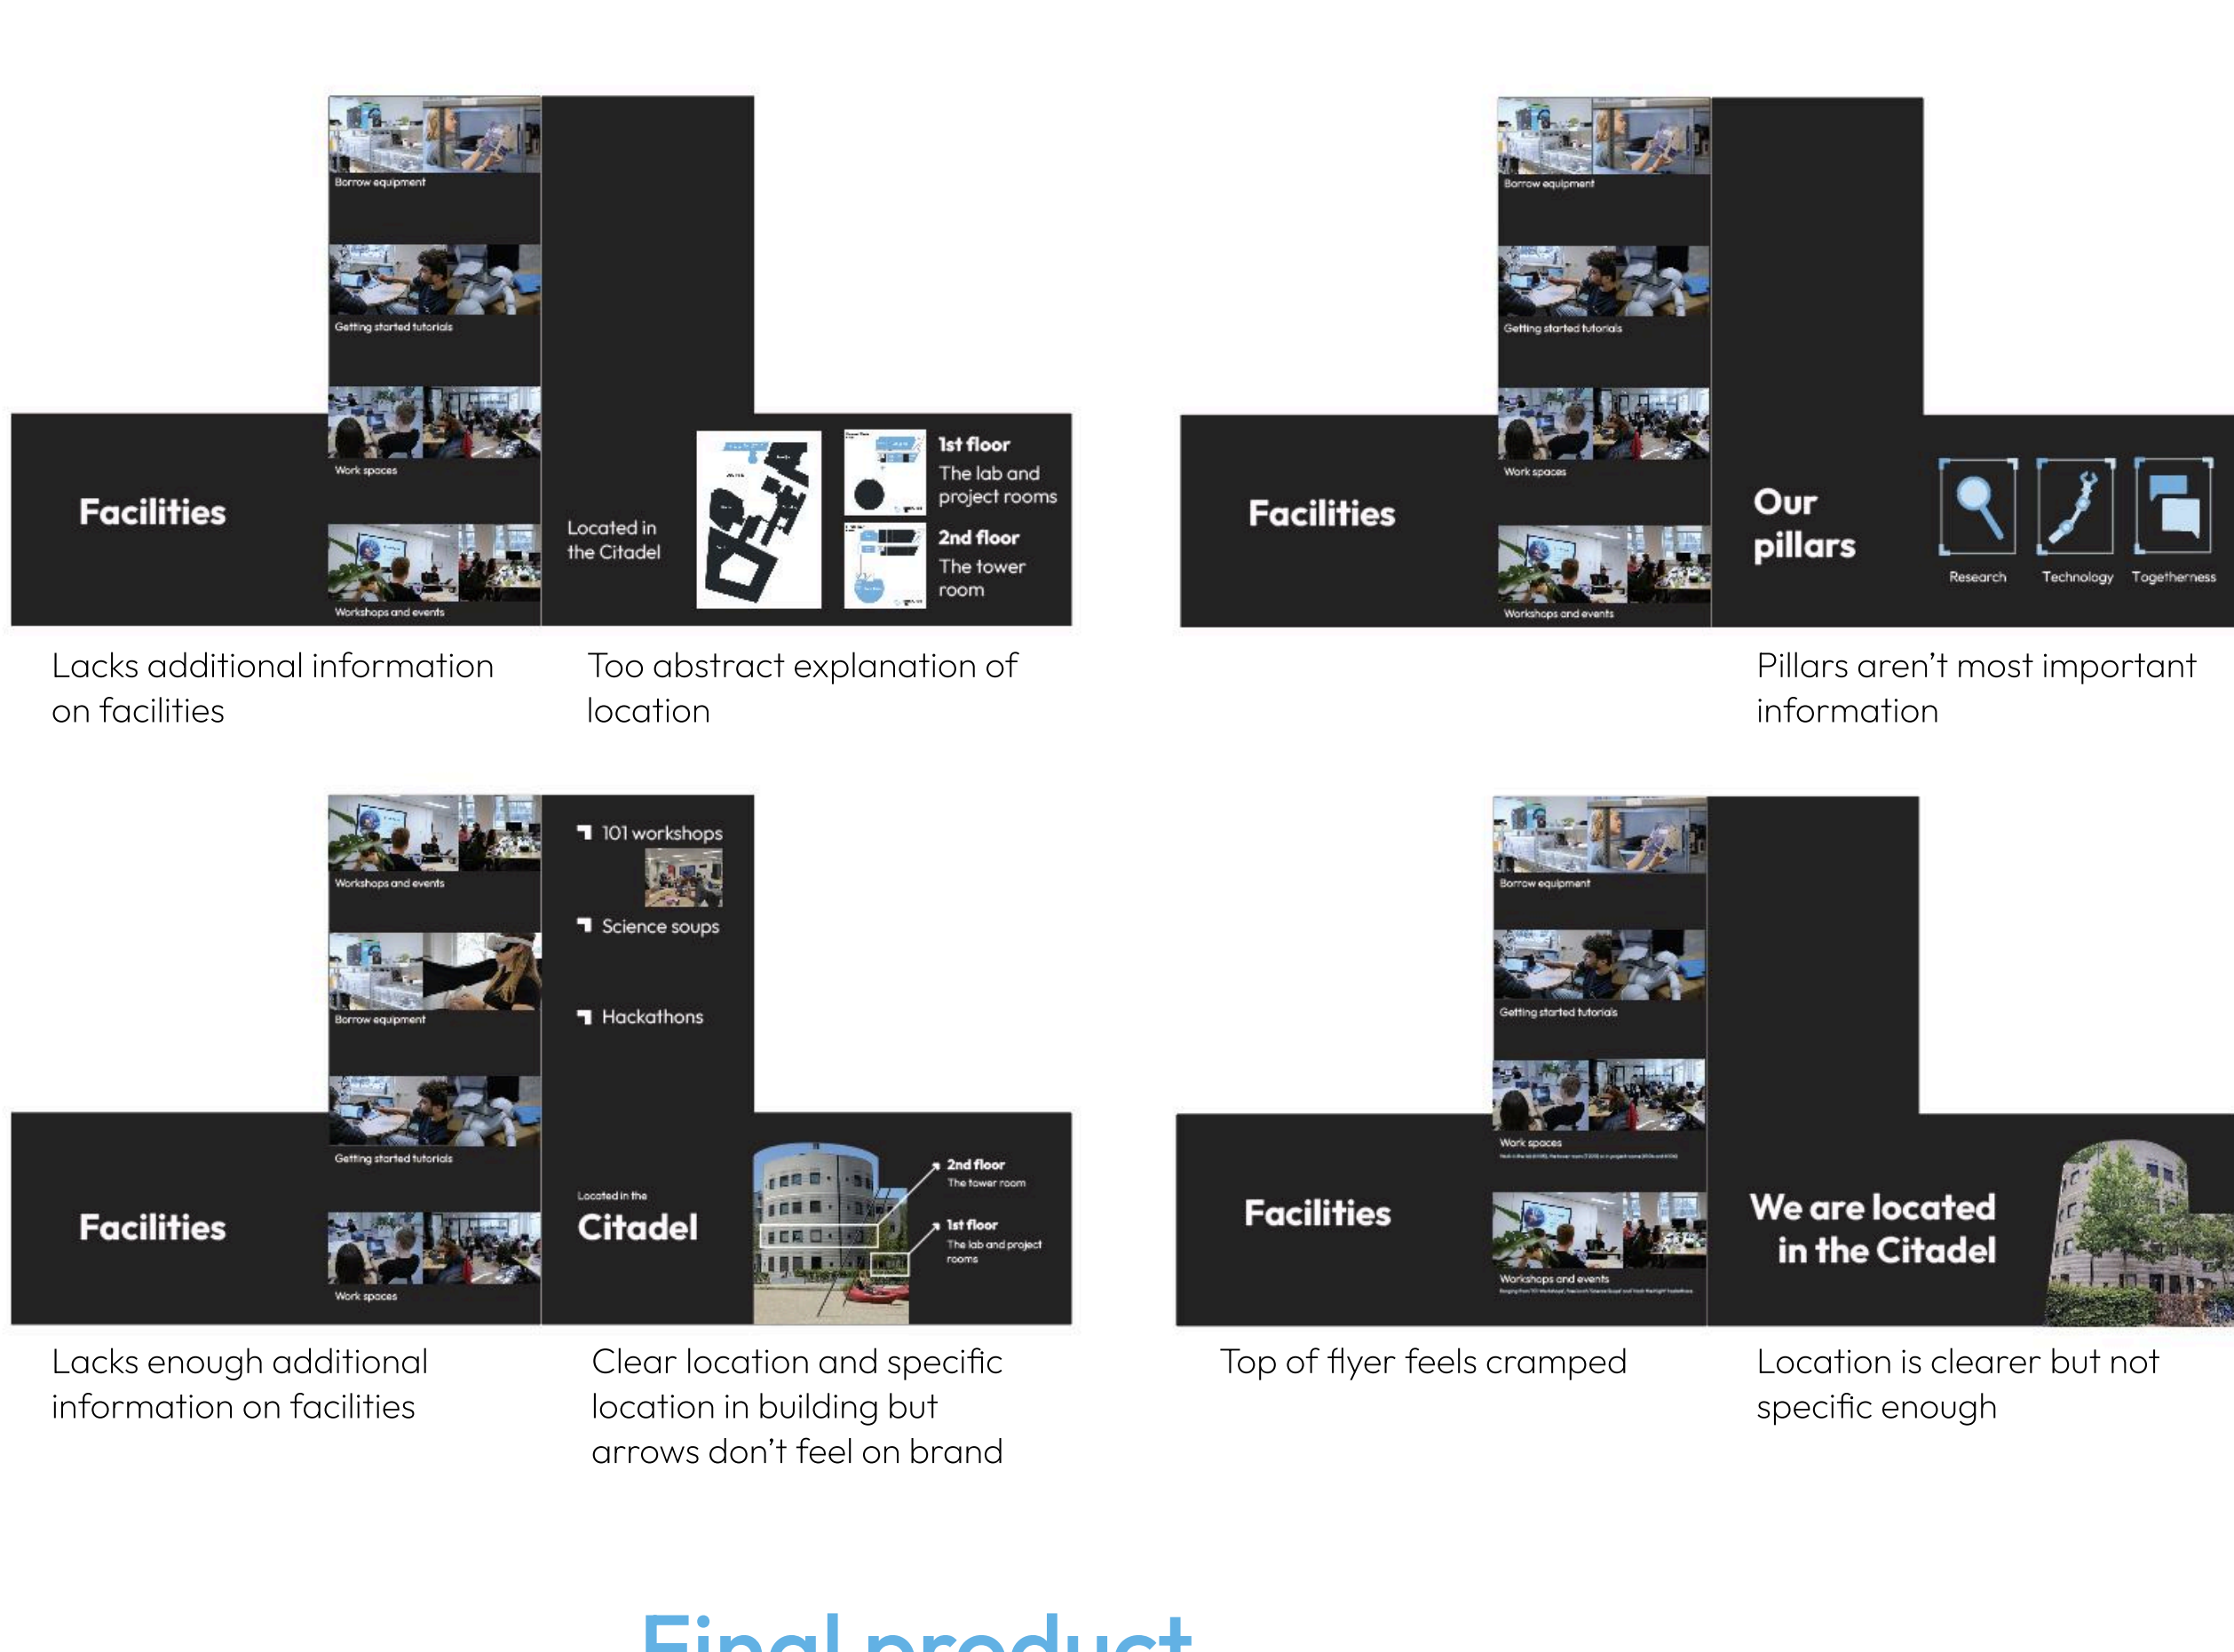

## Content composition iteration

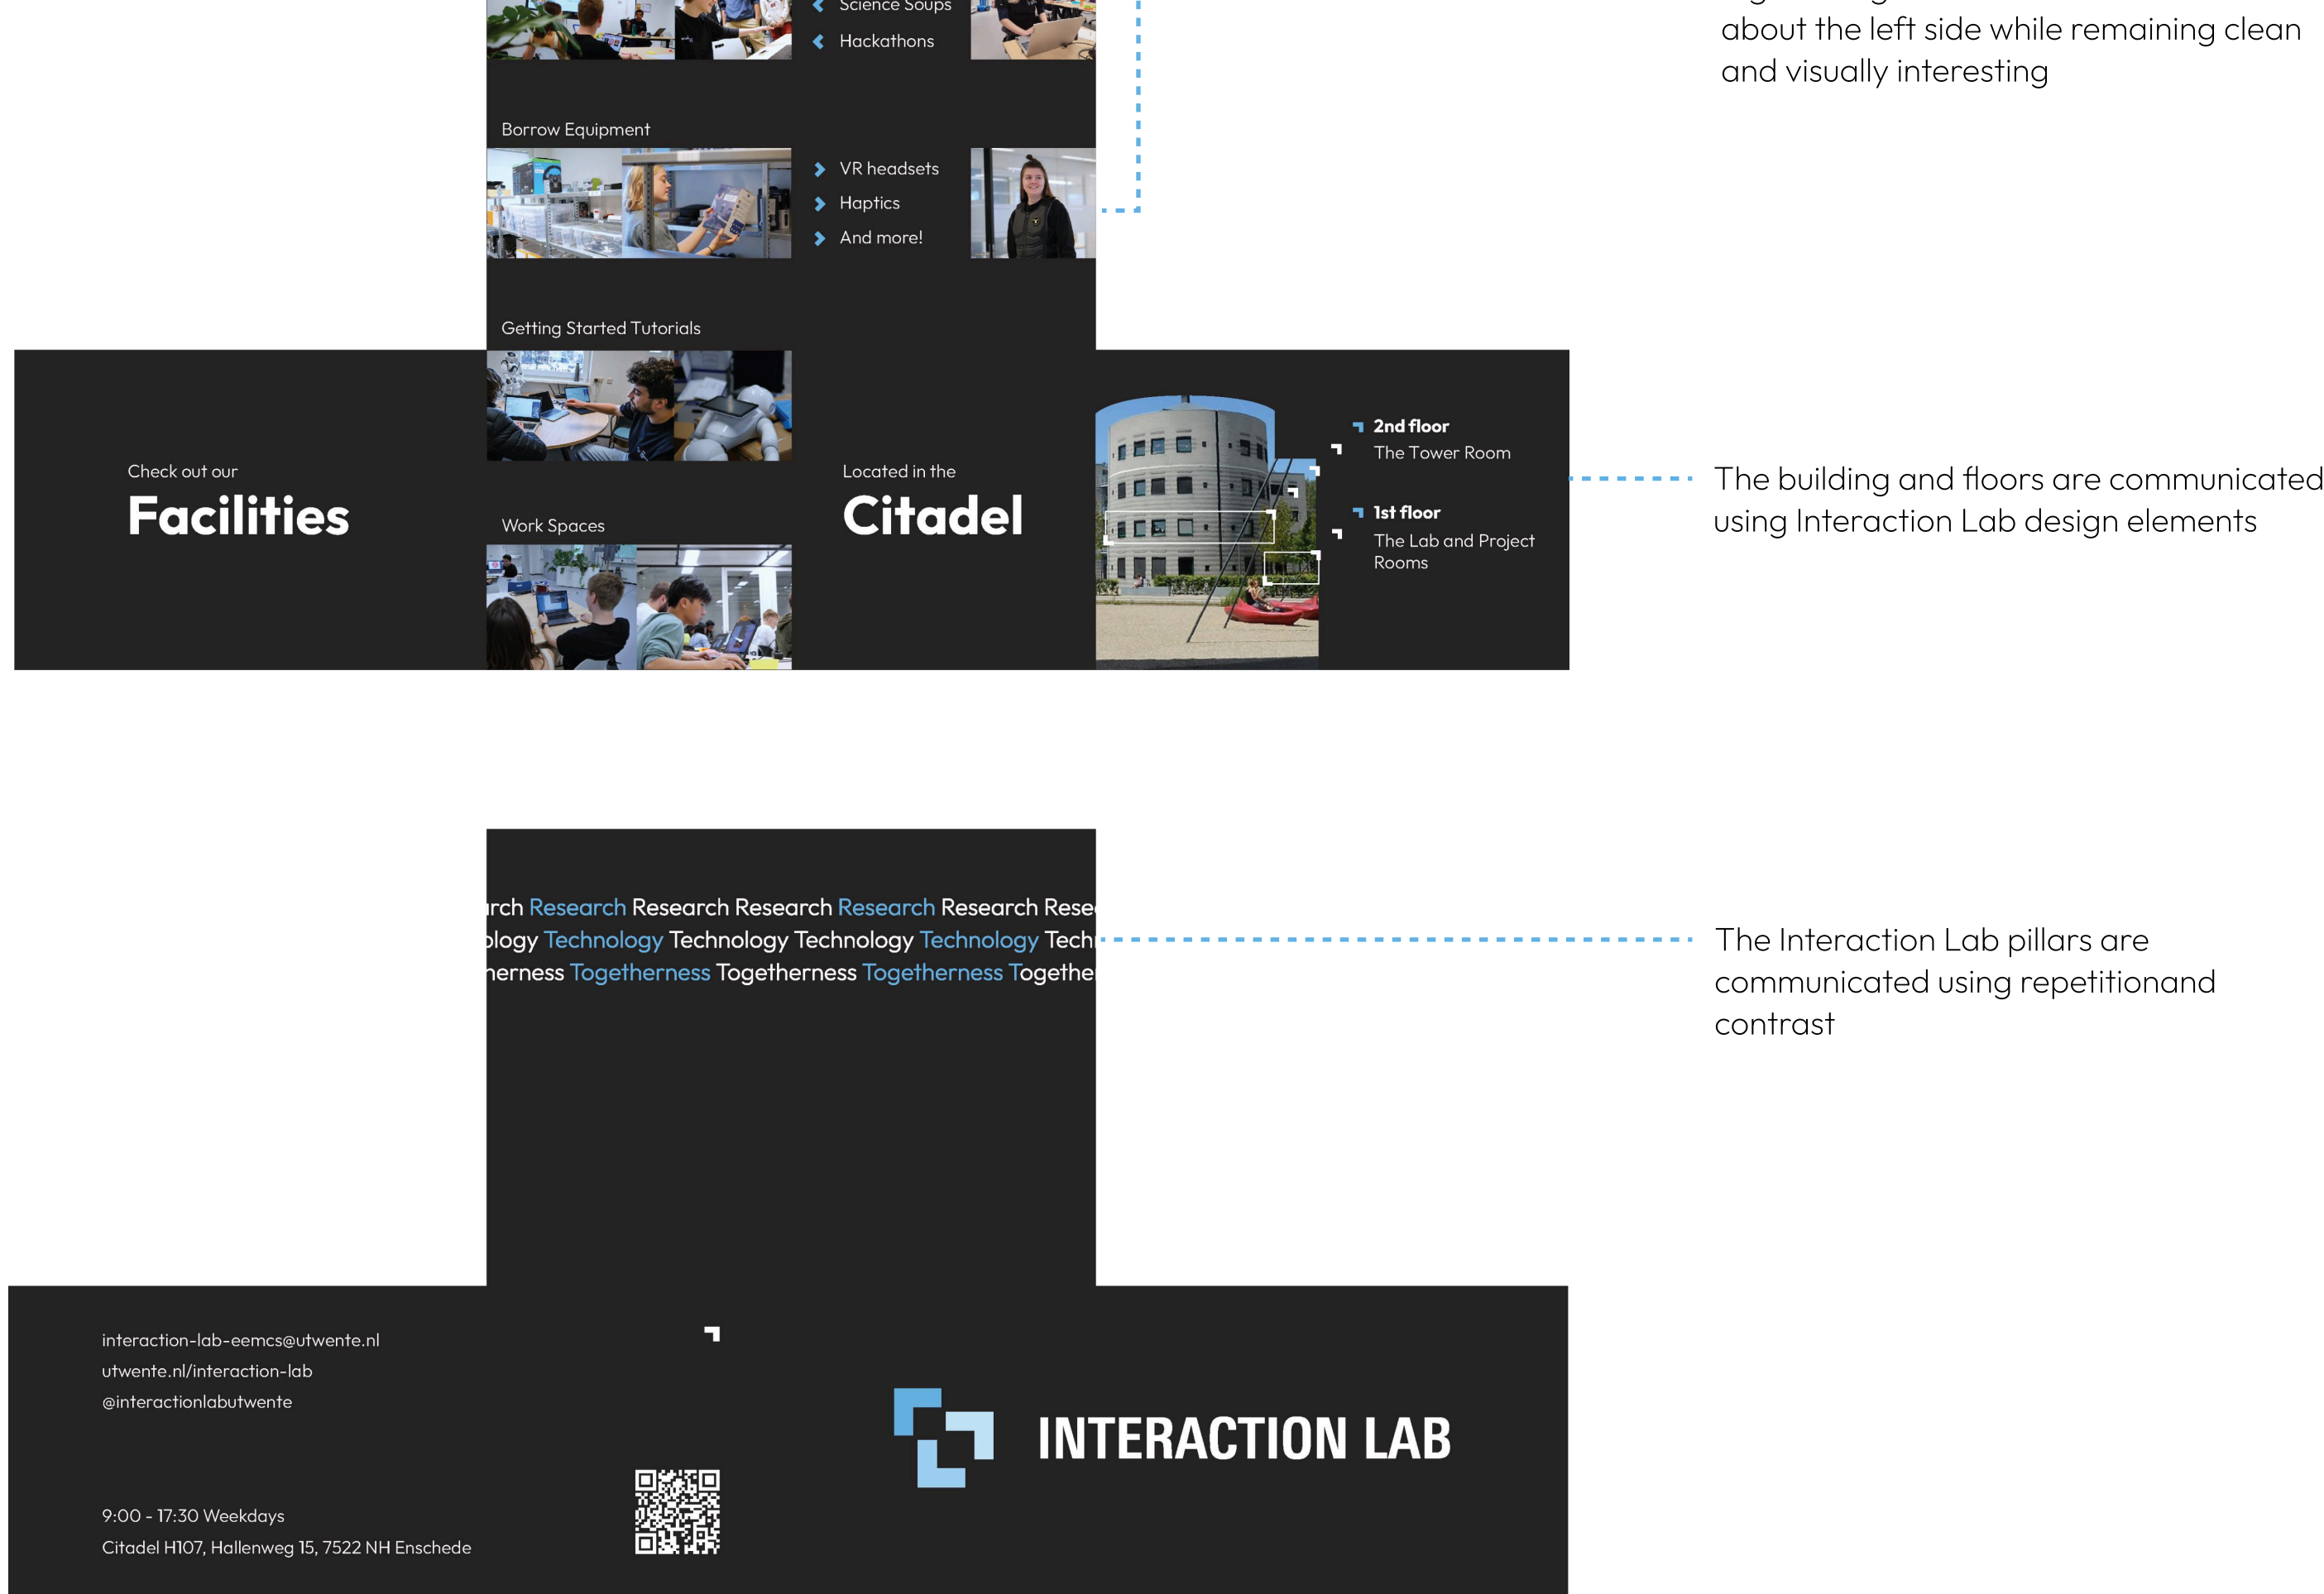

### Outside

### Inside

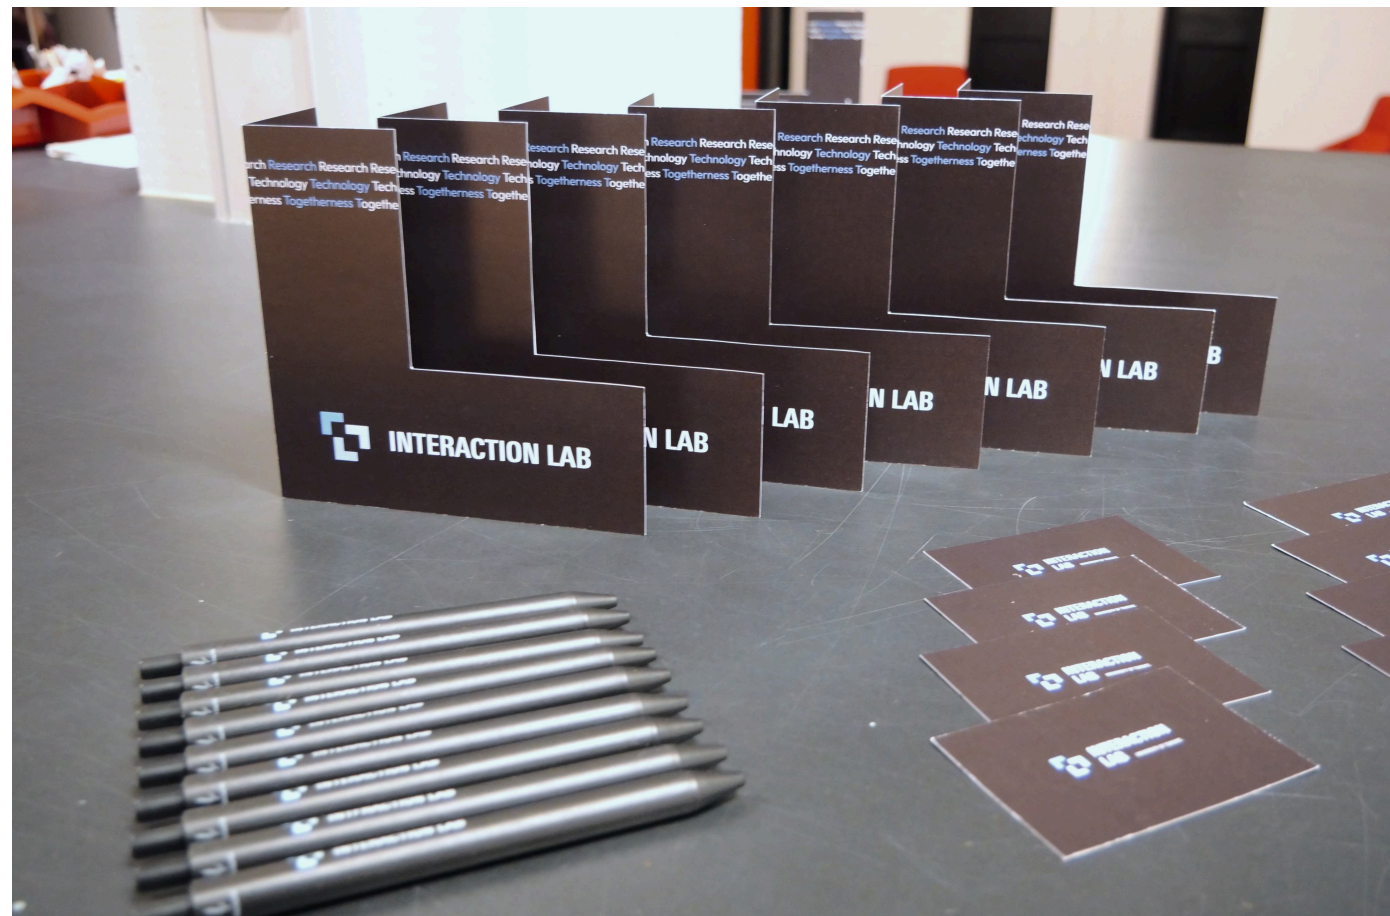

## Final product

Test print

Final flyer

Collection of physical promotional material

## Business cards

### Purpose

Share contact information of the Interaction Lab at events and visitors.

### Audience

Students, professors and researchers interested in what we do at the Lab.

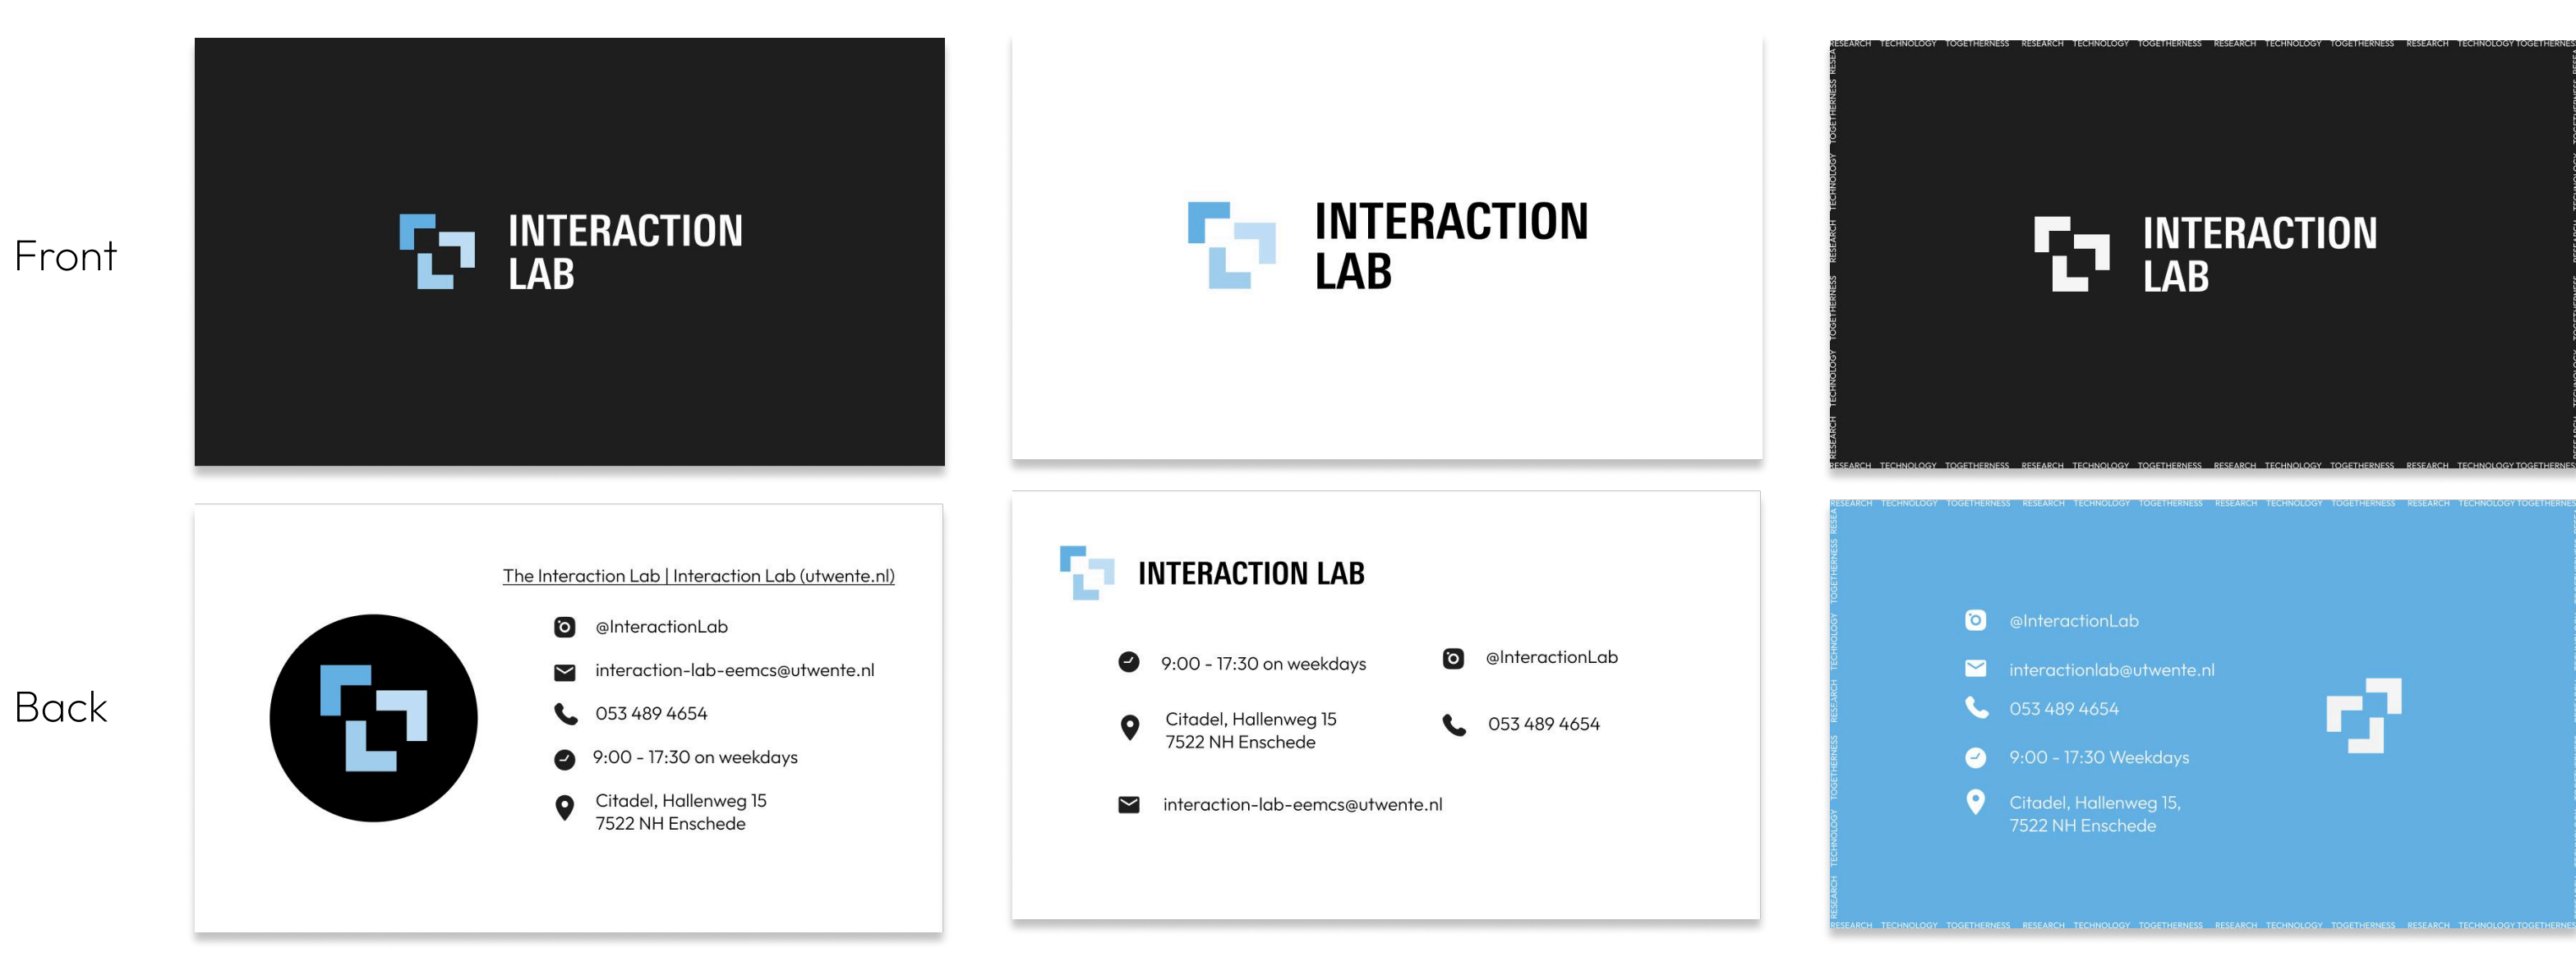

### Medium

Printed.

### My contribution

Designing the business cards and incorporating feedback.

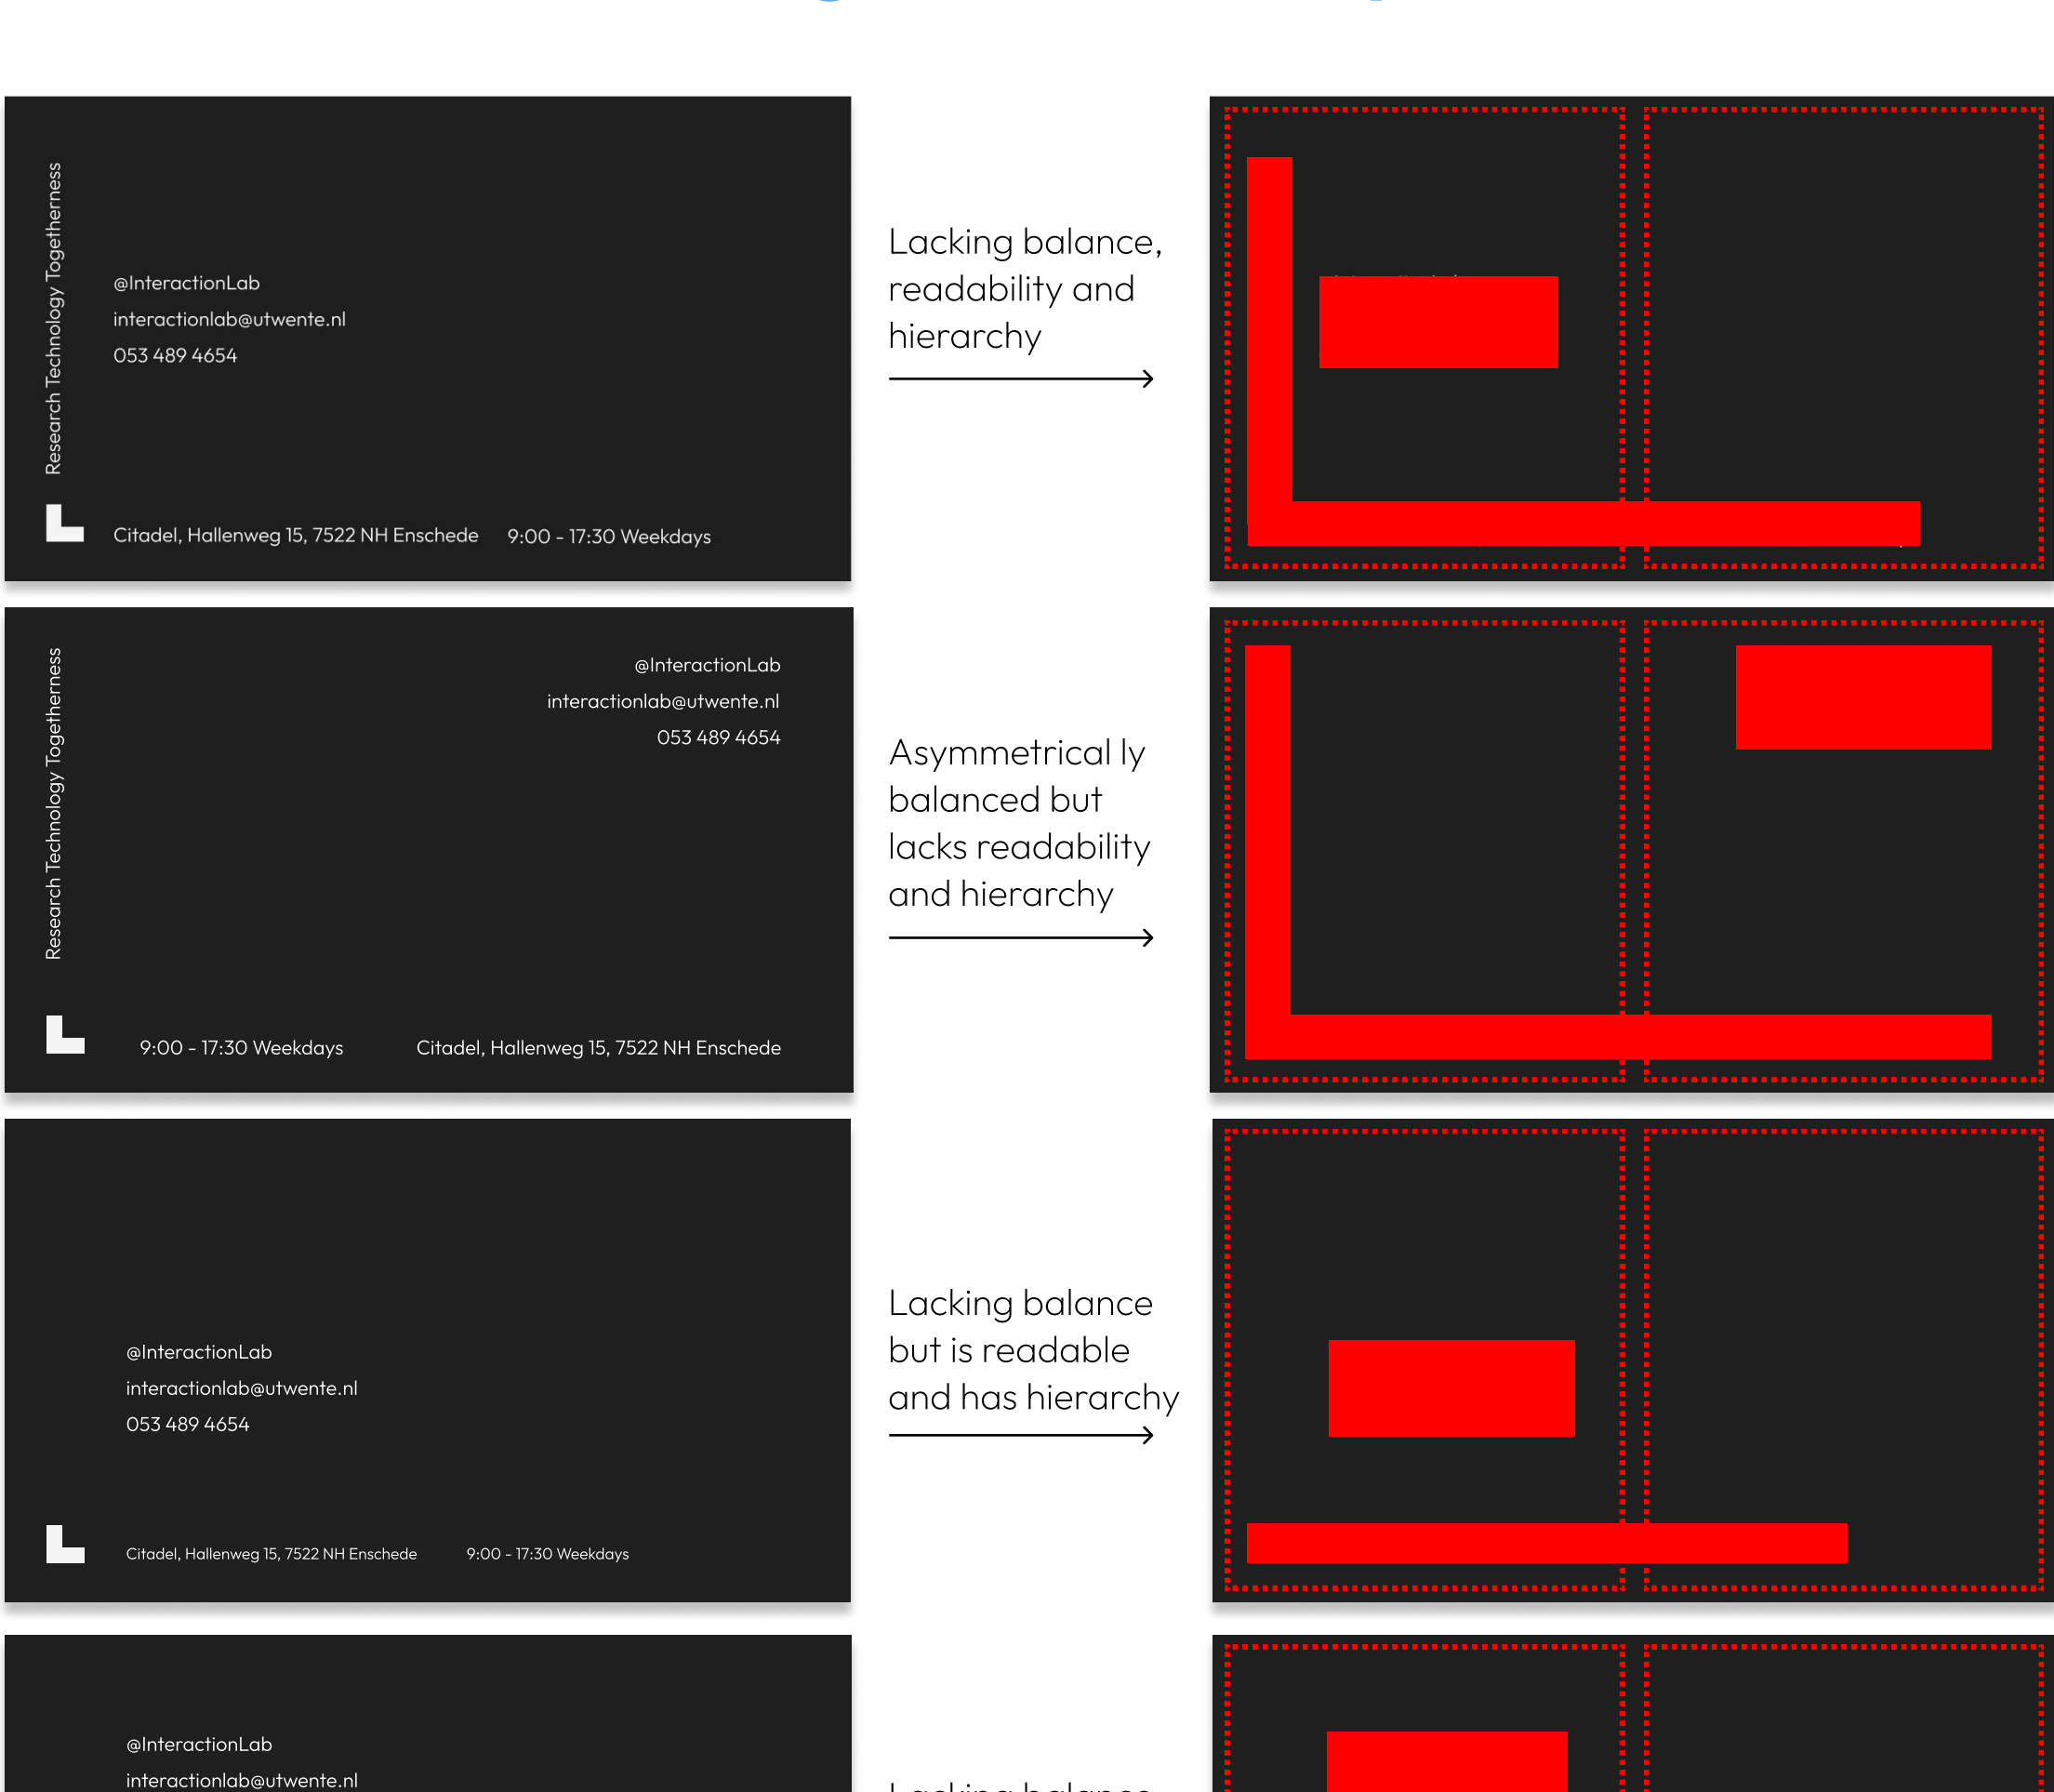

## Exploration

### Review

- Information is very cramped
- Unnecessary icons
- Frontside features only the logo
- All information is present

## Iterating on the composition

## Final design
